Prescribing Mental Health Medication: The Practitioner's Guide Christopher M. Doran

Prescribing Mental Health Medication is a text for practitioners who treat mental disorders with medication. It explains the entire process of medication assessment, management and follow up for general medical practitioners, mental health practitioners, students, residents, prescribing nurses and others perfecting this skill. Already used by providers and training institutions throughout the world, the newly revised second edition is completely updated and focuses on the following key issues:

- How to determine if medication is needed
- Proper dosing and how to start and stop medication
- When to change medication
- Dealing with difficult patients
- Specific mental health symptoms and appropriate medication
- Special populations including pregnant women, substance abusers, children and adolescents, and the elderly
- Monitoring medication with blood levels
- Management of medication side effects and avoidance of medication risk
- The misuse of medication
- Prescription of generic preparations
- Prescriptions via the Internet, telemedicine, and electronic medical records
- Organizing a prescriptive office and record-keeping

Completely updated, this text includes information on all psychotropic medications in use in the United States and the United Kingdom. It incorporates clinical tips, sample dialogues for talking about medications to patients, and information specifically relevant in primary care settings.
