Hamid Mowlana

Global Information and World Communication: New Frontiers in International Relations (Mechanics) Hamid Mowlana

The new edition of this major work offers a comprehensive analysis of international communication systems and the global flow of information. Hamid Mowlana places the analysis of global mass media and other forms of communication within a critical overview of international and intercultural relations.

Extensively rewritten and revised, **Global Information and World Communication** deals with the phenomenon of global information flow in all contexts - political, economic, cultural, technological, legal and professional. Mowlana illustrates how different communication strategies and systems have contributed to the creation of powerful interests and have altered the global scene. He takes into account recent events and shows how these have challenged basic assumptions and theories, enabling the debate about communication and world society to embrace broader concepts of world politics, information economy, cultural ecology and international development.
