Dinosaurs: Amazing Pictures and Animal Facts Everyone Should Know (The Animal Kids' Books Series) (Volume 3) Ann Lawrence

Dinosaurs is the third in a series of books exploring the animal kingdom using both words and amazing pictures of animals.

The world of animals

Animals come in all shapes and sizes and include mammals, birds, fish, reptiles and amphibians. And, whether we are talking about wild animals or their more familiar domestic counterparts, the animal kingdom is a fascinating world that you can spend a lifetime exploring, and only scratch the surface.

Dinosaurs - Amazing Pictures and Animal Facts Everyone Should Know is truly all about dinosaurs and, while I cannot quite have you walking with the dinosaurs, I can take you back to the dinosaur world and introduce you to some of the scary, carnivorous dinosaurs, the huge plant eating dinosaurs, the small feathered dinosaurs and what many people refer to as the dinosaur birds. Indeed, we will look at dinosaurs galore in this dinosaurs A to Z.

The dinosaurs roamed the earth for some 165 million years and this book looks at these fascinating reptiles and answers many questions about them including:

- What is a dinosaur?
- When did the dinosaurs live?
- What did the dinosaurs look like?
- What was the dinosaur world like?
- How big were dinosaurs?
- How do dinosaurs eat their food?
- Who was 'Sue' the dinosaur?
- What happened to the dinosaurs?
- ...and much, much more!

The history of the dinosaurs is fascinating and discoveries of dinosaur bones from around the world mean that we have been able to piece together a wealth of information about these prehistoric creatures. Dinosaur fossils for example allow us to paint a picture of what the Jurassic dinosaurs would have looked like, and how frightening the king of the dinosaurs would have been if you had come face-to-face with him.

So, if you are ready...
