Environmental Transport Phenomena (Green Chemistry and Chemical Engineering)

A. Eduardo Sáez, James C. Baygents

Environmental Transport Phenomena (Green Chemistry and Chemical Engineering) A. Eduardo Sáez, James C. Baygents

Environmental Transport Phenomena offers a detailed yet accessible introduction to transport phenomena. It begins by explaining the underlying principles and mechanisms that govern mass transport and continues by tackling practical problems spanning all subdisciplines of environmental science and chemical engineering.

Assuming some knowledge of ordinary differential equations and a familiarity with basic applications of fluid mechanics, this classroom-tested text:

- Addresses mass conservation and macroscopic mass balances, placing a special emphasis on applications to environmental processes
- Covers the fundamentals of diffusive transport, applications of the diffusion equation, and diffusive transport in reactive systems
- Discusses convective transport, hydrodynamic dispersion, and transport in multiphase systems
- Presents a mathematical framework for formulating and solving transport phenomena problems

Environmental Transport Phenomena makes an ideal textbook for a one-semester advanced undergraduate or graduate introductory course in transport phenomena. It provides a fundamental understanding of how to quantify the spread and distribution of contaminants in the environment as well as the basis for designing processes related to water purification, wastewater treatment, and solid waste disposal, among others.

From reader reviews:

Mohammed Thomas:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each book has different aim as well as goal; it means that e-book has different type. Some people really feel enjoy to spend their time to read a book. They may be reading whatever they take because their hobby is definitely reading a book. Consider the person who don't like reading through a book? Sometime, man feel need book when they found difficult problem or perhaps exercise. Well, probably you'll have this Environmental Transport Phenomena (Green Chemistry and Chemical Engineering).

Charles Wright:

Environmental Transport Phenomena (Green Chemistry and Chemical Engineering) can be one of your basic books that are good idea. We all recommend that straight away because this guide has good vocabulary that may increase your knowledge in words, easy to understand, bit entertaining but nonetheless delivering the information. The article writer giving his/her effort to set every word into enjoyment arrangement in writing Environmental Transport Phenomena (Green Chemistry and Chemical Engineering) however doesn't forget the main place, giving the reader the hottest along with based confirm resource info that maybe you can be certainly one of it. This great information can easily drawn you into brand-new stage of crucial imagining.

Frank Botelho:

Do you really one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Make an effort to pick one book that you just dont know the inside because don't determine book by its protect may doesn't work here is difficult job because you are frightened that the inside maybe not as fantastic as in the outside appearance likes. Maybe you answer may be Environmental Transport Phenomena (Green Chemistry and Chemical Engineering) why because the amazing cover that make you consider in regards to the content will not disappoint you actually. The inside or content is definitely fantastic as the outside or cover. Your reading sixth sense will directly make suggestions to pick up this book.

Nancy Brown:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information from the book. Book is composed or printed or outlined from each source that filled update of news. With this modern era like today, many ways to get information are available for anyone. From media social like newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just trying to find the Environmental Transport Phenomena (Green Chemistry and Chemical Engineering) when you desired it?
