Forest Analytics with R (Use R!)

Andrew P. Robinson

Forest Analytics with R (Use R!) Andrew P. Robinson

Forest Analytics with R combines practical, down-to-earth forestry data analysis and solutions to real forest management challenges with state-of-the-art statistical and data-handling functionality. The authors adopt a problem-driven approach, in which statistical and mathematical tools are introduced in the context of the forestry problem that they can help to resolve. All the tools are introduced in the context of real forestry datasets, which provide compelling examples of practical applications. The modeling challenges covered within the book include imputation and interpolation for spatial data, fitting probability density functions to tree measurement data using maximum likelihood, fitting allometric functions using both linear and non-linear least-squares regression, and fitting growth models using both linear and non-linear mixed-effects modeling. The coverage also includes deploying and using forest growth models written in compiled languages, analysis of natural resources and forestry inventory data, and forest estate planning and optimization using linear programming. The book would be ideal for a one-semester class in forest biometrics or applied statistics for natural resources management. The text assumes no programming background, some introductory statistics, and very basic applied mathematics.

From reader reviews:

Roy Myers:

Hey guys, do you really want to find a new book you just read? Maybe the book with the headline Forest Analytics with R (Use R!) suitable to you? The particular book was written by a well-known writer in this era. Often the book titled Forest Analytics with R (Use R!) is the main one of several books in which everyone reads now. This kind of book has inspired lots of people in the world. When you read this guide you will enter the new dimension that you never know ahead of. The author explained their idea in a simple way, so all of you can easily know the core of this e-book. This book will give you a large amount of information about this world now. So that you can see the representation of the world in this particular book.

Paul Delatorre:

Typically the book Forest Analytics with R (Use R!) will bring you to definitely the new experience of reading a book. The author's style to describe the idea is very unique. If you try to find a new book to study, this book is very appropriate to you. The book Forest Analytics with R (Use R!) is much recommended to you just read. You can also get the e-book through the official website, so you can more easily read the book.

Bruce Harrison:

Are you kind of a stressful person, only have 10 or even 15 minutes in your time to upgrade your mind expertise or thinking skill perhaps analytical thinking? Then you have a problem with the book as compared to can satisfy your short time to read it because this all time you only find publication that needs more time to be read. Forest Analytics with R (Use R!) can be your answer given it can be read by a person who has those short free time problems.

Kristi Rowden:

Beside this Forest Analytics with R (Use R!) in your phone, it can give you a way to get closer to the new knowledge or information. The information and the knowledge you are going to get here is fresh from the oven so don't end up being worried if you feel like an previous person lives in a narrow commune. It is a good thing to have Forest Analytics with R (Use R!) because this book offers for your requirements readable information. Do you occasionally have a book but you seldom get what it's exactly about. Oh come on, that will happen if you have this in the hand. The enjoyable agreement here cannot be questionable, including treasuring a beautiful island. Techniques you still want to miss this? Find this book and read it from currently!
