Lead-Seeking Approaches: 5 (Topics in Medicinal Chemistry)

Lead-Seeking Approaches: 5 (Topics in Medicinal Chemistry)

High quality leads provide the foundation for the discovery of successful clinical development candidates, and therefore the identification of leads is an essential part of drug discovery. The process for the identification of leads generally starts with the screening of a compound collection, either an HTS of a relatively large compound collection (hundreds of thousands to one million plus compounds) or a more focused screen of a smaller set of compounds that have been preselected for the target of interest. Virtual screening methods such as structure-based or pharmacophore-based searches can complement or replace one of the above approaches. Once hits are identified from one or more of these screening methods, they need to be thoroughly characterized in order to confirm activity and identify areas in need of optimization. Finally, once fully characterized hits are identified, preliminary optimization through synthetic modification is carried out to generate leads. Parallel optimization of all properties, including biological, physicochemical, and ADME is the most efficient approach to the identification of leads. Hit characterization is described in the previous chapter. The focus of this chapter is on hit optimization and the identification of leads. After a general overview of these processes, examples taken from the literature since 2001 will be used to illustrate specific points. There are also a number of excellent reviews covering the lead identification process [1–6].

From reader reviews:

Steven Clayton:

Book is to be different for each and every grade. Book for children until adult are different content. To be sure that book is very important for all of us. The book Lead-Seeking Approaches: 5 (Topics in Medicinal Chemistry) had been making you to know about other understanding and of course you can take more information. It is very advantages for you. The e-book Lead-Seeking Approaches: 5 (Topics in Medicinal Chemistry) is not only giving you much more new information but also to be your friend when you experience bored. You can spend your own spend time to read your guide. Try to make relationship together with the book Lead-Seeking Approaches: 5 (Topics in Medicinal Chemistry). You never truly feel lose out for everything when you read some books.

David Manning:

A lot of people always spent all their free time to vacation as well as go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent they will free time just watching TV, or perhaps playing video games all day long. If you need to try to find a new activity honestly, that is look different you can read a new book. It is really fun in your case. If you enjoy the book that you simply read you can spent all day every day to reading a e-book. The book Lead-Seeking Approaches: 5 (Topics in Medicinal Chemistry) it is quite good to read. There are a lot of those who recommended this book. These were enjoying reading this book. In case you did not have enough space to bring this book you can buy the actual e-book. You can m0ore quickly to read this book from the smart phone. The price is not too costly but this book possesses high quality.

Bobby Gonsalves:

Many people spending their time by playing outside having friends, fun activity along with family or just watching TV the whole day. You can have new activity to spend your whole day by reading a book. Ugh, ya think reading a book really can hard because you have to bring the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Smartphone. Like Lead-Seeking Approaches: 5 (Topics in Medicinal Chemistry) which is getting the e-book version. So , why not try out this book? Let's observe.

Francis King:

As a pupil exactly feel bored in order to reading. If their teacher requested them to go to the library or to make summary for some book, they are complained. Just very little students that has reading's spirit or real their passion. They just do what the teacher want, like asked to go to the library. They go to presently there but nothing reading really. Any students feel that studying is not important, boring in addition to can't see colorful pics on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Lead-Seeking Approaches: 5 (Topics in Medicinal Chemistry) can make you sense more interested to read.
