Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product Steven Shire

Monoclonal antibodies (MAbs) are currently the major class of protein bio therapeutic being developed by biotechnology and pharmaceutical companies. Monoclonal Antibodies discusses the challenges and issues revolving around development of a monoclonal antibody produced by recombinant DNA technology into a therapeutic agent. This book covers downstream processing which includes design of processes to manufacture the formulation, formulation design, fill and finish into closure systems and routes of administration. The characterization of the final drug product is covered where the use of biophysical methods combined with genetic engineering is used to understand the solution properties of the formulation. The latter has become very important since many indications such as arthritis and asthma require the development of formulations for subcutaneous delivery (SC). The development of formulations for IV delivery is also important and comes with a different set of challenges. The challenges and strategies that can overcome these limitations are discussed in this book, starting with an introduction to these issues, followed by chapters detailing strategies to deal with them. Subsequent chapters explore the processing and storage of mAbs, development of delivery device technologies and conclude with a chapter on the future of mAbs in therapeutic remedies.

- Discusses the challenges to develop MAbs for intravenous (IV) and subcutaneous delivery (SC)
- Presents strategies to meet the challenges in development of MAbs for SC and IV administration
- Discusses the use of biophysical analytical tools coupled with MAb engineering to understand what governs MAb properties at high concentration

From reader reviews:

George Nygaard:

Reading a guide can be one of a lot of activity that everyone in the world loves. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new facts. When you read a guide you will get new information because book is one of various ways to share the information or maybe their idea. Second, examining a book will make you more imaginative. When you examining a book especially fictional book the author will bring you to definitely imagine the story how the figures do it anything. Third, you could share your knowledge to other people. When you read this Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product, it is possible to tells your family, friends and also soon about yours publication. Your knowledge can inspire different ones, make them reading a reserve.

William Herold:

The particular book Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product has a lot associated with on it. So when you check out this book you can get a lot of help. The book was published by the very famous author. This articles author makes some research ahead of write this book. This particular book very easy to read you may get the point easily after reading this article book.

Robert Henderson:

You could spend your free time to study this book this reserve. This Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product is simple to develop you can read it in the recreation area, in the beach, train in addition to soon. If you did not get much space to bring typically the printed book, you can buy the particular e-book. It is make you quicker to read it. You can save the book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

Susan Romero:

This Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product is completely new way for you who has fascination to look for some information since it relief your hunger of knowledge. Getting deeper you into it getting knowledge more you know or perhaps you who still having tiny amount of digest in reading this Monoclonal Antibodies: Meeting the Challenges in Manufacturing, Formulation, Delivery and Stability of Final Drug Product can be the light food to suit your needs because the information inside this particular book is easy to get by simply anyone. These books create itself in the form that is certainly reachable by anyone, yeah I mean in the e-book type. People who think that in book form make them feel tired even dizzy this guide is the answer. So there is absolutely no in reading a guide especially this one. You can find actually looking for. It should be here for you. So , don't miss the item! Just read this e-book type for your better life and knowledge.
