Animal Architecture (Oxford Animal Biology Series)

Mike Hansell

Animal Architecture (Oxford Animal Biology Series) Mike Hansell

Construction behaviour occurs across the entire spectrum of the animal kingdom and affects the survival of both builders and other organisms associated with them. "Animal Architecture" provides a comprehensive overview of the biology of animal building. The book recognizes three broad categories of built structure - homes, traps, and courtship displays. Even though some of these structures are complex and very large, the behaviour required to build them is generally simple and the anatomy for building unspecialized. Standardization of building materials helps to keep building repertoires simple, while self-organizing effects help create complexity. Some builders exhibit learning and cognitive skills, and include some toolmaking species. In a case-study approach to function, insects demonstrate how homes can remain operational while they grow, spiderwebs illustrate mechanical design, and the displays of bowerbirds raise the possibility of persuasion through design rather than just decoration. Studies of the costs to insect and bird home-builders, and to arthropod web-builders provide evidence of optimal designs and of trade-offs with other life history traits.

As ecosystem engineers, the influence of builders is extensive and their effect is generally to enhance biodiversity through niche construction. Animal builders can therefore represent model species for the study of the emerging subject of environmental inheritance. Evidence that building has facilitated social evolution is mixed. However building, and in particular building with silk, has been demonstrated to have important evolutionary consequences. This book is intended for students and researchers in comparative animal biology, but will also be of relevance and use to the increasing numbers of architects and civil engineers interested in developing ideas from the animal kingdom.

From reader reviews:

Jamie Brewer:

Book is definitely written, printed, or outlined for everything. You can realize everything you want by a guide. Book has a different type. As we know that book is important factor to bring us around the world. Next to that you can your reading proficiency was fluently. A book Animal Architecture (Oxford Animal Biology Series) will make you to always be smarter. You can feel considerably more confidence if you can know about almost everything. But some of you think that open or reading a new book make you bored. It's not make you fun. Why they are often thought like that? Have you searching for best book or suited book with you?

Michael Albin:

Hey guys, do you would like to finds a new book to see? May be the book with the headline Animal Architecture (Oxford Animal Biology Series) suitable to you? The book was written by well known writer in this era. The particular book untitled Animal Architecture (Oxford Animal Biology Series)is the main one of several books this everyone read now. That book was inspired many people in the world. When you read this book you will enter the new way of measuring that you ever know ahead of. The author explained their idea in the simple way, thus all of people can easily to comprehend the core of this book. This book will give you a lots of information about this world now. To help you to see the represented of the world in this book.

Brooke Callender:

The book with title Animal Architecture (Oxford Animal Biology Series) has lot of information that you can learn it. You can get a lot of gain after read this book. This book exist new expertise the information that exist in this publication represented the condition of the world at this point. That is important to yo7u to learn how the improvement of the world. This kind of book will bring you within new era of the glowbal growth. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.

Eugene Williams:

Guide is one of source of expertise. We can add our expertise from it. Not only for students and also native or citizen want book to know the revise information of year to be able to year. As we know those guides have many advantages. Beside we add our knowledge, can bring us to around the world. Through the book Animal Architecture (Oxford Animal Biology Series) we can consider more advantage. Don't that you be creative people? To become creative person must want to read a book. Just simply choose the best book that suited with your aim. Don't end up being doubt to change your life with this book Animal Architecture (Oxford Animal Biology Series). You can more pleasing than now.
