Lays the foundation for new methods and applications of carbohydrate click chemistry

Introduced by K. Barry Sharpless of The Scripps Research Institute in 2001, click chemistry mimics nature, giving researchers the tools needed to generate new substances quickly and reliably by joining small units together. With contributions from more than thirty pioneering researchers in the field, this text explores the many promising applications of click chemistry in glycoscience. Readers will learn both the basic concepts of carbohydrate click chemistry as well as its many biomedical applications, including synthetic antigens, analogs of cell-surface receptors, immobilized enzymes, targeted drug delivery systems, and multivalent cancer vaccines.

Click Chemistry in Glycoscience examines a broad range of methodologies and strategies that have emerged from this rapidly evolving field. Each chapter describes new approaches, ideas, consequences, and applications resulting from the introduction of click processes. Divided into four sections, the book covers:

- Click chemistry strategies and decoupling
- Thio-click chemistry of carbohydrates
- Carbohydrate click chemistry for novel synthetic targets
- Carbohydrate click chemistry in biomedical sciences

Thoroughly researched, the book reflects the most recent findings published in the literature. Diagrams and figures throughout the book enable readers to more easily grasp complex concepts and reaction processes. At the end of each chapter, references lead to the primary literature for further investigation of individual topics.

The application of click chemistry to carbohydrates has tremendous implications for research. With this book as their guide, researchers have a solid foundation from which they can develop new methods and applications of carbohydrate click chemistry, including new carbohydrate-based therapeutics.

From reader reviews:

Carol Hughes:

Often the book Click Chemistry in Glycoscience: New Developments and Strategies will bring that you the new experience of reading some sort of book. The author style to describe the idea is very unique. In case you try to find new book you just read, this book very ideal to you. The book Click Chemistry in Glycoscience: New Developments and Strategies is much recommended to you you just read. You can also get the e-book from your official web site, so you can quickly to read the book.

Jimmy Borrelli:

The book untitled Click Chemistry in Glycoscience: New Developments and Strategies contain a lot of information on that. The writer explains your ex idea with easy way. The language is very easy to understand all the people, so do not worry, you can easy to read the idea. The book was published by famous author. The author brings you in the new period of literary works. It is easy to read this book because you can keep reading your smart phone, or gadget, so you can read the book in anywhere and anytime. If you want to buy the e-book, you can wide open their official web-site as well as order it. Have a nice examine.

Virginia Swain:

In this period of time globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher this print many kinds of book. Often the book that recommended for your requirements is Click Chemistry in Glycoscience: New Developments and Strategies this guide consist a lot of the information with the condition of this world now. That book was represented just how can the world has grown up. The language styles that writer use to explain it is easy to understand. Typically the writer made some study when he makes this book. Honestly, that is why this book appropriate all of you.

Phyllis Wilder:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information from the book. Book is composed or printed or created from each source this filled update of news. In this particular modern era like right now, many ways to get information are available for anyone. From media social like newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just in search of the Click Chemistry in Glycoscience: New Developments and Strategies when you desired it?
