Website Development with PyroCMS Zachary Vineyard

In Detail

As web developers face constant pressure to build websites faster and smarter, many are turning to PyroCMS as a great way to use established programming patterns to create a website. PyroCMS is used by businesses and individuals all over the world and can easily be adopted for your next website project.

Through clear descriptions and code examples, we will show you how to quickly create system themes, manage data streams, and to get the most out of PyroCMS. The book also shows you how to create great websites using the simple methods inherent to PyroCMS. You will learn to make use of smart programming patterns and excellent template tools to build system add-ons and themes.

Leading you through all the major aspects of building a website using PyroCMS, you'll start by learning how to install the system. The book will teach you the basic features of PyroCMS, like how to use the control panel, and will also provide quick tutorials on how to build system add-ons, system themes, custom page types, layouts, and to get the most out of PyroCMS. Finally, you will end by using the built-in Streams module to manage large sets of data for your site.

This is an excellent resource for developers who are looking to easily create & build a variety of websites and web-enabled applications.

Approach

A practical and a fast-paced guide that gives you all the information you need to start developing websites with PyroCMS. The book is an excellent resource for developers and makes website development easy and financially viable for everyone.

Who this book is for

This book is ideal if you are a PHP developer who is looking for a great content management system or a web developer looking to speed up your development times. If you are a web developer, you will need to have some familiarity with OOP and the MVC programming pattern, especially if you want to extend PyroCMS by building add-ons.
