Introduction to Probability (Chapman & Hall/CRC Texts in Statistical Science)

Joseph K. Blitzstein, Jessica Hwang

Introduction to Probability (Chapman & Hall/CRC Texts in Statistical Science) Joseph K. Blitzstein, Jessica Hwang

Developed from celebrated Harvard statistics lectures, **Introduction to Probability** provides essential language and tools for understanding statistics, randomness, and uncertainty. The book explores a wide variety of applications and examples, ranging from coincidences and paradoxes to Google PageRank and Markov chain Monte Carlo (MCMC). Additional application areas explored include genetics, medicine, computer science, and information theory. The print book version includes a code that provides free access to an eBook version.

The authors present the material in an accessible style and motivate concepts using real-world examples. Throughout, they use *stories* to uncover connections between the fundamental distributions in statistics and *conditioning* to reduce complicated problems to manageable pieces.

The book includes many intuitive explanations, diagrams, and practice problems. Each chapter ends with a section showing how to perform relevant simulations and calculations in R, a free statistical software environment.

From reader reviews:

Christi Potter:

In this 21st century, people become competitive in each and every way. By being competitive right now, people have do something to make all of them survives, being in the middle of often the crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Yep, by reading a publication your ability to survive boost then having chance to stand up than other is high. For you who want to start reading the book, we give you that Introduction to Probability (Chapman & Hall/CRC Texts in Statistical Science) book as basic and daily reading book. Why, because this book is greater than just a book.

Ruth Graham:

As people who live in the actual modest era should be up-date about what going on or facts even knowledge to make all of them keep up with the era that is always change and progress. Some of you maybe will update themselves by studying books. It is a good choice for you personally but the problems coming to you is you don't know what one you should start with. This Introduction to Probability (Chapman & Hall/CRC Texts in Statistical Science) is our recommendation so you keep up with the world. Why, because book serves what you want and need in this era.

Robert Hutzler:

Reading a book to be new life style in this calendar year; every people loves to learn a book. When you study a book you can get a lot of benefit. When you read publications, you can improve your knowledge, simply because book has a lot of information upon it. The information that you will get depend on what sorts of book that you have read. In order to get information about your study, you can read education books, but if you want to entertain yourself you are able to a fiction books, this kind of us novel, comics, and also soon. The Introduction to Probability (Chapman & Hall/CRC Texts in Statistical Science) provide you with a new experience in reading a book.

Karen Delamora:

As a pupil exactly feel bored to reading. If their teacher questioned them to go to the library or to make summary for some book, they are complained. Just minor students that has reading's spirit or real their interest. They just do what the professor want, like asked to the library. They go to at this time there but nothing reading seriously. Any students feel that looking at is not important, boring in addition to can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Introduction to Probability (Chapman & Hall/CRC Texts in Statistical Science) can make you sense more interested to read.
