Getting Started with Arduino: The Open Source Electronics Prototyping Platform (Make) Massimo Banzi, Michael Shiloh

Arduino is the open source electronics prototyping platform that has taken the Maker Movement by storm. This thorough introduction, updated for the latest Arduino release, helps you start prototyping right away. From obtaining the required components to putting the final touches on your project, all the information you need is here!

Getting started with Arduino is a snap. To use the introductory examples in this guide, all you need is an Arduino Uno or Leonardo, along with a USB cable and an LED. The easy-to-use, free Arduino development environment runs on Mac, Windows, and Linux.

In *Getting Started with Arduino*, you'll learn about:

- Interaction design and physical computing
- The Arduino board and its software environment
- Basics of electricity and electronics
- Prototyping on a solderless breadboard
- Drawing a schematic diagram
- Talking to a computer--and the cloud--from Arduino
- Building a custom plant-watering system

From reader reviews:

Howard Depriest:

The reason? Because this Getting Started with Arduino: The Open Source Electronics Prototyping Platform (Make) is an unordinary book that the inside of the book waiting for you to snap the item but latter it will jolt you with the secret this inside. Reading this book beside it was fantastic author who else write the book in such incredible way makes the content inside easier to understand, entertaining approach but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this any more or you going to regret it. This book will give you a lot of benefits than the other book get such as help improving your ability and your critical thinking means. So , still want to hesitate having that book? If I were you I will go to the reserve store hurriedly.

Sonya Wright:

Getting Started with Arduino: The Open Source Electronics Prototyping Platform (Make) can be one of your beginner books that are good idea. Most of us recommend that straight away because this reserve has good vocabulary that may increase your knowledge in vocabulary, easy to understand, bit entertaining but nonetheless delivering the information. The author giving his/her effort to get every word into pleasure arrangement in writing Getting Started with Arduino: The Open Source Electronics Prototyping Platform (Make) however doesn't forget the main place, giving the reader the hottest and based confirm resource data that maybe you can be considered one of it. This great information may drawn you into new stage of crucial considering.

Herbert Beckley:

Within this era which is the greater particular person or who has ability to do something more are more important than other. Do you want to become one of it? It is just simple solution to have that. What you have to do is just spending your time very little but quite enough to possess a look at some books. Among the books in the top record in your reading list will be Getting Started with Arduino: The Open Source Electronics Prototyping Platform (Make). This book that is certainly qualified as The Hungry Mountains can get you closer in getting precious person. By looking way up and review this guide you can get many advantages.

Leslie Hackett:

Do you like reading a e-book? Confuse to looking for your preferred book? Or your book had been rare? Why so many query for the book? But almost any people feel that they enjoy for reading. Some people likes looking at, not only science book but additionally novel and Getting Started with Arduino: The Open Source Electronics Prototyping Platform (Make) as well as others sources were given knowledge for you. After you know how the truly amazing a book, you feel would like to read more and more. Science guide was created for teacher or students especially. Those ebooks are helping them to increase their knowledge. In other case,

beside science publication, any other book likes Getting Started with Arduino: The Open Source Electronics Prototyping Platform (Make) to make your spare time far more colorful. Many types of book like this one.
