Getting Started with .NET Gadgeteer (Make: Projects) Simon Monk

Learn how to quickly build cool electronic gadgets with .NET Gadgeteer. With the easy-to-follow instructions in this guide, you'll tackle five fascinating projects, using Microsoft's rapid prototyping Gadgeteer platform. There's no soldering involved—you simply plug in modules that make gadget-building quick and easy.

Ideal for beginners, this book shows you how to work with modules and other hardware in the popular Fez Spider Starter Kit, and teaches you how to program your gadgets with Visual Studio C# Express and the .NET Micro Framework 4.1 SDK. You'll soon learn a wide range of programming techniques along with the skills to design your own projects.

- Get to know the software and hardware with a simple LED project
- Download code from the companion site to build and test each project
- Build a spy camera that automatically captures and saves images at regular intervals
- Construct a simple animated game with the joystick module
- Create a web server that sends messages you draw or write on the touchscreen module
- Build a gadget that backs up digital images from an SD card to a USB flash drive
- Learn about other .NET Gadgeteer modules for creating environmental sensors, an MP3 player, and a WiFi network

From reader reviews:

James McDonald:

Nowadays reading books become more and more than want or need but also become a life style. This reading habit give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book this improve your knowledge and information. The data you get based on what kind of reserve you read, if you want send more knowledge just go with training books but if you want sense happy read one having theme for entertaining including comic or novel. The particular Getting Started with .NET Gadgeteer (Make: Projects) is kind of book which is giving the reader erratic experience.

Christopher Barry:

Your reading sixth sense will not betray a person, why because this Getting Started with .NET Gadgeteer (Make: Projects) publication written by well-known writer who knows well how to make book that could be understand by anyone who all read the book. Written within good manner for you, dripping every ideas and publishing skill only for eliminate your own hunger then you still skepticism Getting Started with .NET Gadgeteer (Make: Projects) as good book not simply by the cover but also through the content. This is one reserve that can break don't evaluate book by its handle, so do you still needing a different sixth sense to pick that!? Oh come on your reading sixth sense already told you so why you have to listening to a different sixth sense.

Sara Burns:

Is it you actually who having spare time in that case spend it whole day through watching television programs or just lying down on the bed? Do you need something totally new? This Getting Started with .NET Gadgeteer (Make: Projects) can be the response, oh how comes? It's a book you know. You are so out of date, spending your free time by reading in this new era is common not a geek activity. So what these guides have than the others?

Delbert Lambert:

Many people said that they feel uninterested when they reading a book. They are directly felt this when they get a half elements of the book. You can choose the actual book Getting Started with .NET Gadgeteer (Make: Projects) to make your current reading is interesting. Your personal skill of reading talent is developing when you just like reading. Try to choose very simple book to make you enjoy to read it and mingle the impression about book and studying especially. It is to be first opinion for you to like to open up a book and read it. Beside that the e-book Getting Started with .NET Gadgeteer (Make: Projects) can to be your brand new friend when you're really feel alone and confuse in doing what must you're doing of that time.
