High-Performance Liquid Chromatography: Advances and Perspectives: 5 Csaba Horvath

High-Performance Liquid Chromatography: Advances and Perspectives, Volume 5 presents the applications of high-performance liquid chromatography to the analysis and purification of biopolymers.

The book, composed of three chapters, provides a detailed description of silica gel-supported stationary phases; tackles biospecific interaction chromatography, a tool in the study of complex carbohydrates and as an industrial separation process in biotechnology; and discusses the potential advantages of displacement chromatography for multicomponent separations.

Chromatographers, chemists, and researchers in the field of chemical analysis will find this book a good source of information.
