Financial and Macroeconomic Connectedness: A Network Approach to Measurement and Monitoring

Francis X. Diebold, Kamil Yilmaz

Connections among different assets, asset classes, portfolios, and the stocks of individual institutions are critical in examining financial markets. Interest in financial markets implies interest in underlying macroeconomic fundamentals. In *Financial and Macroeconomic Connectedness*, Frank Diebold and Kamil Yilmaz propose a simple framework for defining, measuring, and monitoring connectedness, which is central to finance and macroeconomics. These measures of connectedness are theoretically rigorous yet empirically relevant.

The approach to connectedness proposed by the authors is intimately related to the familiar econometric notion of variance decomposition. The full set of variance decompositions from vector auto-regressions produces the core of the 'connectedness table.' The connectedness table makes clear how one can begin with the most disaggregated pair-wise directional connectedness measures and aggregate them in various ways to obtain total connectedness measures. The authors also show that variance decompositions define weighted, directed networks, so that these proposed connectedness measures are intimately related to key measures of connectedness used in the network literature.

After describing their methods in the first part of the book, the authors proceed to characterize daily return and volatility connectedness across major asset (stock, bond, foreign exchange and commodity) markets as well as the financial institutions within the U.S. and across countries since late 1990s. These specific measures of volatility connectedness show that stock markets played a critical role in spreading the volatility shocks from the U.S. to other countries. Furthermore, while the return connectedness across stock markets increased gradually over time the volatility connectedness measures were subject to significant jumps during major crisis events.

This book examines not only financial connectedness, but also real fundamental connectedness. In particular, the authors show that global business cycle connectedness is economically significant and time-varying, that the U.S. has disproportionately high connectedness to others, and that pairwise country connectedness is inversely related to bilateral trade surpluses.

From reader reviews:

George Gentry:

Reading a book can be one of a lot of task that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people like it. First reading a publication will give you a lot of new data. When you read a e-book you will get new information simply because book is one of a number of ways to share the information or perhaps their idea. Second, reading through a book will make you more imaginative. When you looking at a book especially fiction book the author will bring you to imagine the story how the characters do it anything. Third, it is possible to share your knowledge to some others. When you read this Financial and Macroeconomic Connectedness: A Network Approach to Measurement and Monitoring, you can tells your family, friends in addition to soon about yours guide. Your knowledge can inspire the others, make them reading a publication.

Jerry Blair:

As we know that book is significant thing to add our knowledge for everything. By a guide we can know everything you want. A book is a range of written, printed, illustrated or perhaps blank sheet. Every year had been exactly added. This book Financial and Macroeconomic Connectedness: A Network Approach to Measurement and Monitoring was filled with regards to science. Spend your extra time to add your knowledge about your research competence. Some people has various feel when they reading a book. If you know how big good thing about a book, you can really feel enjoy to read a reserve. In the modern era like at this point, many ways to get book that you simply wanted.

Jackie Frost:

That reserve can make you to feel relax. This book Financial and Macroeconomic Connectedness: A Network Approach to Measurement and Monitoring was vibrant and of course has pictures around. As we know that book Financial and Macroeconomic Connectedness: A Network Approach to Measurement and Monitoring has many kinds or style. Start from kids until youngsters. For example Naruto or Investigator Conan you can read and believe you are the character on there. Therefore , not at all of book tend to be make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book to suit your needs and try to like reading this.

Annie Resnick:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is prepared or printed or descriptive from each source that will filled update of news. In this modern era like right now, many ways to get information are available for anyone. From media social such as newspaper, magazines, science book, encyclopedia, reference book, book and comic. You can add your understanding by that book. Ready to spend your spare time to spread out your book? Or just looking for the Financial and Macroeconomic Connectedness: A Network Approach to Measurement and

Monitoring when you essential it?
