Transformations of Religion and the Public Sphere: Postsecular Publics (Palgrave Politics of Identity and Citizenship Series)

Transformations of Religion and the Public Sphere: Postsecular Publics contributes a counter-discourse to the myth of secularism. This myth is a strongly-held belief, predominantly advocated in the westernised world, that progress and modernity is intimately linked to secular politics and social relations. This book develops a range of critiques of this myth through discussions on the current political, social, and technological conditions in which we find ourselves. It explores the political implications of the myth, as well as exploring postcolonial relations, liberal-secularism and religious sentiments, and the mediated public sphere, with an in-depth focus on the Dutch case. *Transformations of Religion and the Public Sphere: Postsecular Publics* takes issue with the secular condition and accepted beliefs of its liberal emancipatory foundations.
